Summary

Full-Stack MERN Developer with hands-on experience building and deploying applications using React.js, Node.js, Express.js, and MongoDB. Built and deployed 3+ full-stack projects covering authentication, REST APIs, and database-driven backends, plus a full-stack internship at CSIR-CIMFR. Backed by a strong foundation in Core Java, OOP, Data Structures & Algorithms, and DBMS, with 300+ problems solved across coding platforms.

Technical Skills

Programming: JavaScript, Core Java, SQL

Frontend: React.js, HTML, CSS, Bootstrap, Tailwind CSS

Backend: Node.js, Express.js, REST APIs, JWT Authentication

Database: MongoDB, SQL, Database Design, Schema Design

Java & CS Fundamentals: OOP, Collections Framework, Exception Handling, Multithreading, Generics, Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks

Tools: Git, GitHub, Postman, Axios

Currently Learning: Spring Boot, Spring MVC, Hibernate/JPA

Experience

CSIR-CIMFR

Jun 2025 – Jul 2025

Vocational Training – Web Development, Dhanbad, India

- Built the frontend and backend REST APIs for a full-stack iron ore classification system using React, Flask, and MongoDB, enabling real-time prediction and monitoring.
- Integrated YOLOv5 and ResNet18 models into the application pipeline (0.779 precision, 0.812 recall) and implemented JWT-based authentication.
- Developed a live monitoring dashboard to display classification results and system status to users.

AppThing

Dec 2023 – Feb 2024

Web Developer Intern (Remote)

- Built and debugged responsive UI components using HTML, CSS, JavaScript, and React, and implemented new features requested by the team.
- Identified and fixed UI and logic bugs while collaborating with the team through structured coding and code-review practices.

Projects

ProShop – E-commerce Platform

Live: Website **GitHub:** Repository

- Built a full-stack e-commerce platform (MERN) with user authentication, cart management, and secure checkout.
- Implemented product reviews, ratings, dynamic pricing, an admin panel, and image uploads using Multer, backed by REST APIs and MongoDB.
- Connected the React frontend to Express/Node backend services, handling data flow between UI, API, and database layers.

Wanderlust – Booking Platform

Live: Website **GitHub:** Repository

- Built a full-stack booking platform with user authentication, CRUD operations for listings, and dynamic routing.
- Designed the database schema and REST API endpoints to handle listing creation, updates, and retrieval.

Student Attendance Management System (Final Year Project)

Live: Website **GitHub:** Repository

- Built a full-stack (MERN) attendance system with face recognition and eye-blink liveness detection using face-api.js to reduce proxy attendance.
- Implemented role-based authentication, an admin dashboard, and student management using Node.js, Express.js, and MongoDB.
- Added attendance history tracking and CSV export functionality for reporting.

Education

B.Tech in Computer Science and Engineering

2022 – 2026

University College of Engineering and Technology (VBU), Jharkhand

CGPA: 7.87/10

Achievements & Certifications

- Solved 300+ Data Structures and Algorithms problems across LeetCode and other coding platforms.
- Built and deployed 3+ full-stack applications with authentication, REST APIs, and database integration.
- Web Development Training – NullClass: [Certificate Link](#)
